B.Sc.-III CBCS Pattern Semester-VI 021C - Mathematics Paper-IV (DSE-VIII) : Special Relativity-II

| P. Pages : 2 Time : Three Hours | | | S * 6 7 5 8 * | GUG/W/23/13362 Max. Marks : 60 | |
|------------------------------------|------|--------------|--|--|--|
| | Note | es: 1. 2. | Solve all the questions. Each question carry equal marks. | | |
| | | | UNIT – I | | |
| 1. | a) | | hat any covariant tensor of the second order may be expressed as the tric & skew symmetric tensor. | te sum of 6 | |
| | b) | Show t | hat if A^m , Bnrs are tensors then A^m Bmrs is also a tensor. | 6 | |
| | | | OR | | |
| | c) | Show t | hat $\frac{dg}{g} = g^{mn} dg_{mn} = -g_{mn} dg^{mn}$ | 6 | |
| | d) | | hat an element of volume $g^{\frac{1}{2}}dx^{1}dx^{2} dx^{N}$ is invariant. | 6 | |
| | | | UNIT – II | | |
| 2. | a) | Show t | hat $g_r^{mn} = -g^{ms} \overline{ sr^n} - g^{sn} \overline{ sr^m}$. | 6 | |
| | b) | - | te the nonvanishing Christoffel symbols of second kind for $hr^2 + r^2 d\theta^2 + r^2 \sin^2 \theta d\phi^2$ | 6 | |
| | | | OR | | |
| | c) | Prove t | hat $\frac{\delta A}{\delta u} = \frac{dA}{du}$ for a scalar A. | 6 | |
| | d) | | hat under a linear transformation of a coordinate system $_{n}^{m} x'^{n} + b^{m}, a_{n}^{m}, b^{m}$ are constants, the Christoffel symbols are tenso | 6 ors. | |
| | | | LINIT – III | | |

UNIT – III

| 3. | a) | Obtain the transformation equations for mass. | |
|----|----|---|---|
| | b) | Obtain the transverse & longitudinal mass. | 6 |

OR

| | c) | A particle is given a kinetic energy equal to n times its rest energy $m_0 C^2$ what are its speed & momentum? | | |
|----|----|--|---|--|
| | d) | Find the expression for four velocity in component form. | | |
| | | $\mathbf{UNIT} - \mathbf{IV}$ | | |
| 4. | a) | Obtain wave equation for propagation of magnetic field strength. | 6 | |
| | b) | Obtain expression for transformation of charge density. | | |
| | | OR | | |
| | c) | Show that the energy momentum tensor of electromagnetic field is trace free. | | |
| | d) | Prove that: $\overline{E}' \cdot \overline{H}' = \overline{E} \cdot \overline{H} \& E'^2 - H'^2 = E^2 - H^2$. | 6 | |
| 5. | | Solve any six: | | |
| | | a) Define the inner product of tensors. | 2 | |
| | | b) Define the contraction of tensor. | 2 | |
| | | c) define Christoffel symbols. | 2 | |
| | | d) Show that $\delta_{n;r}^m = 0$ | 2 | |
| | | e) Show that $P^2 - E^2 / C^2 = -m_0^2 C^2$ | 2 | |
| | | f) Define the four force. | 2 | |
| | | g) State the Lorentz gauge condition. | 2 | |
| | | h) Define the electromagnetic field tensor Fij. | 2 | |
| | | | | |
